

## 新建分支并切换

```
git checkout -b <branchName>
```

## 提交

```
git commit -m ""
```

## 切换到主分支 master

```
git checkout master
```

## 合并某个分支到主分支 master

```
git merge <brachName>
```

## 合并后删除分支信息

```
git branch -d <branchName>
```

## 查看所有分支信息

```
git branch -a
```

## 签出某个分支

```
git branch -a
```

## 提示错误: fatal: refusing to merge unrelated histories

- 粗暴的解决方法:

```
git pull --allow-unrelated-histories
```

## Reference

如何使用git将分支branch合并到主分支master上
