Selenium 刷新页面

通常使用 Selenium 的 `refresh()` 方法刷新页面即可；这里列举五种刷新页面的方法，任君采劼

- Using sendKeys.Keys method

```
driver.get("https://accounts.google.com/SignUp")
driver.findElement(By.id("firstname-placeholder")).sendKeys(Keys.F5)
```

- Using navigate.refresh() method

```
driver.get("https://accounts.google.com/SignUp")
driver.navigate().refresh()
```

- Using navigate.to() method

```
driver.get("https://accounts.google.com/SignUp")
driver.navigate().to(driver.getCurrentUrl())
```

- Using get() method

```
driver.get("https://accounts.google.com/SignUp")
driver.get(driver.getCurrentUrl())
```

- Using sendKeys() method

```
driver.get("https://accounts.google.com/SignUp")
driver.findElement(By.id("firstname-placeholder")).sendKeys("\uE035")
```
